During October, European credit markets experienced a positive performance (H9PC Index +1.07%) in tandem with a positive movement of the Eurostoxx 50 (+2.20%), while S&P500 reached new historical highs at 2'575 (+2.22% during the month). The ECB meeting was one of the main topics of the month: Mario Draghi reiterated the ECB accommodative stance announcing a reduction in monthly purchases to €30bn from January to September 2018, with no sudden stop of the program thereafter. In US president Trump and his staff started discussions on next FED chairman: Yellen or Powell appointment would represent continuity, while Taylor or Warsh a more hawkish solution (final decision will be announced before the Presidential Asian trip). From a macro point of view, US economic data continued to confirm a solid path of growth, with Q3 GDP ahead of expectations at 3%, and the reporting season was strong globally with US, Europe and Japan posting EPS growth of 7%, 8% and 10% respectively. EM credit markets generated positive returns this month (EMHB Index +0.73%), helped also by Xi Jinping reappointment as General Secretary of the CPC after the party congress.
