August 2018

Strategy

The sub-fund aims to generate significant excess return vs 3m Euribor in combination with extremely low volatility. The strategy combines the “buy and hold” investment in a highly diversified and granular portfolio of liquid short-term fixed income securities with the “opportunistic” allocation to a number of credit active strategies. Global Market Picture

August was a very volatile month for markets. European credit markets were flat (H9PC Index 0%), while equity markets experienced a divergent performance with Eurostoxx 50 losing -3.8% while S&P 500 gaining +3%. The FOMC released July/August minutes with no major surprises, indicating more risks on the horizon (Trade, Emerging Markets, Fiscal and Housing) and continuing to be set on hiking rates gradually (other two hikes this year, and probably two more next year). 10 years Bund yield compressed to 0.33% from 0.44% on general fly to quality movement, due to risks arising in Emerging Markets and uncertainty over Italian budget, while 10 years Treasury yield was lower at 2.86% (from 2.96%) with US curve experiencing a flattening to 23 bps. Emerging markets were on the spotlight, due to many uncertainties arising from different countries, with Turkey and Argentina suffering the most, for different reasons: Turkey's dispute over Pastor Brunson with the US and its reaction with sanctions on two ministers and tariffs on Turkish steel and aluminium, let the Turkish lira weakening almost 30% since the beginning of the year, arising uncertainties over inflation and the actual response and independence of its central bank to calm markets; while Argentina requested an early disbursement of the agreed IMF 50bn plan, scaring market of possible needs that were not priced in, and intervening with a hike of interest rates to a record level of 60%, to stem the currency depreciation. On the back of this, ongoing talks with China on trade, US sanctions to Russia on chemical use and a brand new deal with Mexico replacing NAFTA were other relevant topic of the month. As said, Emerging markets credit performance was negative again (EMHB Index -2.56%) after July positive relief..
