

# Swan Bond Enhanced Sicav–SIF CHF

## April 2019

### Strategy

The sub-fund aims to generate significant excess return vs 3m Libor CHF in combination with extremely low volatility. The strategy is focused on the “buy and hold” levered investment in a highly diversified and granular portfolio of liquid short-term fixed income securities. Leverage is normally included between 100% and 200% of the NAV with invested capital between 2x and 3x the NAV.

### Performance

MTD :	<b>0.28%</b>	Fund Assets (mln) :	116.8 €
Since inception	<b>7.07%</b>	1 Year Std Dev :	1.06%
Last 12 Months :	<b>1.86%</b>	1 Year Sharpe Ratio :	2.45
NAVps :	CHF 107.07	% of positive months :	73%

### Risk Profile

Conservative

**Intermediate**

High Reward

### Global market picture

April was another strong month: European credit markets were positive (H9PC Index +1.41%), likewise equity markets with Eurostoxx 50 and S&P 500 gaining respectively 4.86% and 3.93%. Economic data sent opposite messages in US: labor market and 1Q GDP release were strong (change in NFP at 196k vs 177k and 1Q GDP at 3.2% vs 2.3%) in contrast with CPI at just 2%, while CESIUSD index reached its lowest level in two years at -58.7. FED minutes confirmed how patient will be the Committee in raising rates and also how markets participants are skeptical about imminent hikes, with Fed funds futures pricing no rate movements in 2019 and one rate cut to December 2020. 10 years Treasury moved higher, to 2.50% from 2.41%, in tandem with yield on 10 Years German Bund that closed the month at 0.01% (8bps during the month) notwithstanding weak data from Europe. Mario Draghi speech after ECB meeting on 10th of April reinforced the view that rates in Europe will remain on hold for longer expected, and that the new TLTRO will provide sufficient liquidity to European banks. Political risk was concentrated on the Brexit saga: the final date was postponed to 31st of October, leaving some additional months to find an agreement and removing the immediate risk of a no-deal. Emerging markets reported a positive performance (+0.72%) with Emea being the best performer during the month. EM resilience was mainly due to the dovish tone of all the Central Banks around the world and constructive talks between US and China (even if we are still waiting for a final agreement), in addition to continued strength of oil prices (Brent up 6% at 73 USD per barrel).

### Yield-type strategy

The bucket generated a positive gross contribution to the monthly performance, with 91% of the positions (85 out of 93) contributing positively. Positive contributions were homogeneously distributed, the only exceptions being KOC 04/20, DNONO 06/20 and ISCTR 04/20, while there were not significant negative contributions. The average life of the yield-type portfolio is very short (10 months or average spread duration of 0.82), combined with a yield of 2.83% (net of funding cost in EUR) and z-spread of 406 basis points. The fund is levered, being invested at about 159% currently.
