

Swan Long Short Credit Sicav–SIF

June 2022

Strategy

Swan Long Short Credit SIF is the alternative version of our Fixed Income High Reward risk profile. Depending on market conditions, the strategy combines an highly diversified buy and hold portfolio of liquid short-term fixed income securities, in a levered format, with an opportunistic allocation to longer dated securities in Global HY markets. Leverage is normally included between 0% and 150% of the NAV. Target Return is 3 months LIBOR + 450 bps.

Risk Profile

Conservative Intermediate **High Reward**

Global Market Picture

Credit markets remained extremely negative with year to date performances ranging from -14.15% for EM corp HY to -8.36% of the EU HY component in tandem with the movement of the Eurostoxx 50 (-19.62% YTD) and S&P 500 (-20.57% YTD). The IG EUR market is also negative by -12.19% YTD, mainly due to the rates component. The short-term (1-3 year) H1WN global HY index also reports a performance of -12.29% YTD while the Global unconstrained (in terms of maturity) HY lost -15.79%. Hostilities between Russia and Ukraine continued on the ground, while there were no signs of de-escalation on the diplomacy side, with NATO broadening its influence to Finland and Sweden. Inflation and possible recession remained the main topics influencing markets: US consumer prices remained at four decades high of 8.6% (core at 6.0%, slightly below previous print), with Powell confirming that FED will fight inflation and that "the process is highly likely to involve some pain". ECB surprised markets with its hawkish message, signaling a 25bps hike in July, that will be followed by a further 50bps hike in September. Also the SNB raised rates by 50bps for the first time in 15 years, leaving Japan the only DM central bank not yet moving. In this context, the 10 years bund yield was higher at +1.34% (+22bps in the month, highest level since 2014) while the 10 years Treasury closed the month at 3.01% (+17bps). Oil price corrected lower, with Brent now at 114.8\$ per barrel, still well supported by supply concerns that exceed fear of an imminent recession. Thanks to recent volatility spike we have been able to add several new credit stories at very interesting level of credit spreads. The new entries are companies with good credit metrics that were too tight before sell-off. The combination of higher diversification, higher credit quality and higher expected yields paves the way for attractive returns in the next future.

Active portfolio

Credit Allocation Scoring (CAS) indicates a medium-long-dated allocation of 1.45%, flat relatively to the end of May (1.45%). Fund's actual exposure (beta and duration adjusted) is 47.09%, higher relatively to last month (43.33%). The mix between Strategic and Tactical positions is 0% Strategic and 100% Tactical. The fund has an estimated yield of 15.49% (net of funding cost in EUR), a low spread duration of 2.56 and a z spread of 1509.

Yield-type bucket

The bucket generated a negative gross contribution to the monthly performance, with 32% of the positions (30 out of 94) contributing positively. During the month we increased our invested capital: conditions are always attractive in the short-term part of the credit curve. The average life
