Swan Short-Term High Yield – USD **May 2019**

Strategy

The sub-fund aims to generate a significant excess return vs 3m Libor in combination with below-average market volatility. Depending on market conditions, the strategy combines in variable proportions the "buy and hold" investment in a highly diversified and granular portfolio of liquid short-term fixed income securities with the "strategic" and/or "tactical" investment in HY or EM securities denominated in hard

May was the first negative month of 2019: European credit markets were negative (H9PC Index -1.39%), likewise equity markets with Eurostoxx 50 and S&P 500 loosing respectively 6.66% and -6.58%. Economic data sent negative messages in US: flash PMI at 50.9 coupled with weak retail sales indicated possible further weakness in the economy; these circumstances added to ongoing trade tensions with China caused a significant downward movement in 10 years Treasury from 2.50% to 2.12% (lowest level since August 2017). The FED left rates unchanged on 1st May meeting and during the conference Jerome Powell was quite hawkish, rejecting the possibility of rates cut, but markets participants continued to be highly skeptical about FED policy, pricing around two cumulative cuts for 2019 and three and a half for 2020. Yield on 10 years German Bund was influenced by the risk-off tone of the markets, closing the month at -0.20% (lowest level on history). Political risk was concentrated on the Brexit saga (with Teresa May announcing to step down) and continuous trade war between China and US: new sanctions imposed by Trump administration on tech giant Huawei caused retaliation by China that threatened bans on export of rare earth. Emerging markets reported a slightly negative performance (-0.15%) with LATAM being the best performer during the month. EM resilience was mainly due to the rally in Treasury and generic dovish tone of central bankers around the world. Oil retraced significantly during the month (Brent down 11% at 64USD per barrel) due to renewed worries on global growth.

Credit Allocation Scoring (CAS) indicates a medium-long-dated allocation of 21.40%, flat relatively to the end of April (21.40%). Fund's actual exposure (beta and duration adjusted) is 14.68%, lower relatively to last month (15.26%). The mix between Strategic and Tactical positions is 0% Strategic and 100% Tactical. The fund has an estimated gross yield of 2.60% (in EUR), a low spread duration of 0.93 and a z spread of 316.

Yield-type bucket

The bucket generated a positive gross contribution to the monthly performance, with 88% of the positions (61 out of 69) contributing positively. Positive contributions were homogeneously distributed, while negative contribution was generated by the COFP complex.
